

Projects

Netflixgpt

- Adding ai feature in Netflix clone
- TMDB API Integration: The application interacts with the TMDB (The Movie Database) API to fetch information about movies and videos. User Input: The user provides input, such as their mood or a specific search query for movies. Recommendation Generation: Based on the user input and the context understood by ChatGPT, the application generates personalized movie recommendations. TMDB API Query: The application queries the TMDB API again, this time to fetch details about the recommended movies, such as plot summaries, ratings, trailers, and more. Presentation: Finally, the application presents the recommended movies to the user, along with relevant information, allowing them to explore and enjoy their movie choices.
- I'm using the TMDB API to fetch videos, and with the help of ChatGPT, I can provide you with movie recommendations tailored to your mood or search query.

Skills Developed: React.js, Javascript, Tailwind, Redux, Firebase, API

Skills

React.js | Javascript | ExpressJs | MongoDB | Prisma | PostgreSQL | Material-UI | Tailwind | HTML | Typescript

Education

Maharaja Agrasen Institute of Technology
B.Tech, Information Technology (IT) | 8.3 CGPA
2022 - 2026

Sarvodaya Bal vidyalaya no. 1 sarojini nagar
Class XII | 9 CGPA
2021 - 2021
